All vehicles should stop before the scale approach, and then proceed slowly. Please pull off scale slowly until you are clear.

Allow the vehicle in front of you to pull completely off the scale before pulling on. If you have a red light, wait until you get the green light. In order to get accurate weights, the scale needs to zero out between vehicles.

Do not shift gears on the scale or come to an abrupt halt. Sudden jerks to the scale can either throw off the calibration or actually damage the scale mechanism.
