

COVID-19 ROADMAP to Recovery

Sustainable physical distancing protocols are critical to each phase of our planned reopening. To be successful, every community member's behaviors and commitment to effective physical distancing are critical. Please be vigilant in protecting yourself, your family, your employees, and your community.

We all need to do our part as individuals to contain COVID-19 by committing to:

- Maintaining 6 feet of physical distance

- Washing hands often

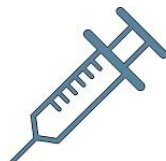

- Wearing face coverings in public

- Staying home when sick

- Getting tested immediately if symptoms occur

- Getting the flu vaccine

Roadmap criteria that must be met to move into all Stabilization Stages

1. A sustained decrease in cases for at least 14 days to implement Stabilization Stage I and percentage of positive tests below 10% thereafter.

- a. Measured by new cases per day, self-reports (where applicable), and positivity rates
- b. Proxy measurement: new cases among health care workers
- c. Proxy measurement: outbreaks and/or new cases within dormitory-style housing
- d. Proxy measurement: hospital admissions for COVID-19

2. Hospitals are safely able to treat patients without resorting to crisis standards of care

- a. Hospital has adequate PPE and equipment to safely treat all patients
- b. Access to regional alternative care site or regional plans are in place
- c. Hospitalizations are stable or decreasing

3. Testing can be performed for all people with symptoms consistent with COVID-19 infection

- a. Testing capacity that is routinely accessible within 24 hours to every person who is symptomatic and results can be returned within 12-24 hours of specimen collection.

4. Active monitoring is in place for all COVID-19 cases and their contacts

- a. Isolation orders can be delivered within 6 hours of case report
- b. Active monitoring and isolation must be in place
- c. Capacity improved and maintained at state and local level with roles delineated
- d. Enforcement capacity and process is clear in every jurisdiction

5. Clear protocol in place that requires physical distancing and assists with case identification

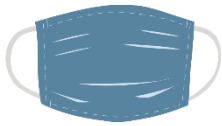

- a. Older adults (age 65 and older) and individuals with underlying medical conditions that are at increased risk of serious COVID-19 illness are encouraged not to attend gatherings (including employees) and to tele-work where possible.
- b. Face coverings must be worn indoors in all places open to the public; face coverings must be worn outdoors whenever 6 ft. of separation among individuals cannot be maintained.
- c. Employees must be screened for COVID-19 symptoms each day. Anyone symptomatic will be excluded from work for at least 7 days, tested within 48 hours, and have face coverings provided for all members of the employee's household.
- d. Physical distancing measures must be employed to ensure that employees and the public can easily maintain a min. of 6 ft. distance.
- e. Businesses complete Physical Distancing Protocol and provide to all employees and customers, posted at entrances and on websites.
- f. Enforcement capacity and process is clear in every jurisdiction.

To enter into the Recovery Phase, a vaccine against COVID-19 must be widely available.

Businesses must complete the [Physical Distancing Protocol](#), per the Summit County Public Health Order. Additional activity-specific guidance may apply on the [Colorado Department of Public Health & Environment](#) or [Summit County Business Resources](#) websites. All of the below are subject to change, per updated Public Health Orders and other Industry Precautions. Some activities and sectors may move through the stages of stabilization more quickly than others. The **green highlighted boxes** below indicate the current stage of a given industry, sector or activity.

Activities

Stabilization Stage I

Stabilization Stage II

Stabilization Stage III

No significant increase in cases

No significant increase in cases

Meet the Roadmap Criteria

Stabilization Stage I criteria met & maintained

Abbreviations and Acronyms

CDPHE: Colorado Department of Public Health and Environment

COVID-19: The disease caused by the novel coronavirus, 2019-nCoV

DORA: Colorado Department of Regulatory Affairs

PDP: Physical Distancing Protocol, completed by a business to create and share a plan for physical distancing and other protective measures for employees and members of the public. This was previously referred to as the Social Distancing Protocol, or SDP, and Summit County has changed its name to emphasize that social connection is critical during the pandemic Response, Stabilization and Recovery phases.

PPE: Personal protective equipment, worn to minimize exposure to hazards in the workplace that could cause injuries or illnesses
